Project Design Phase I

Solution Architecture

Date	16 october 2022
Team ID	PNT2022TMID29591
Project Name	Project- Personal Expense Tracker Application
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

☐ Find the best tech solution to solve existing business problems.

☐ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

☐ Define features, development phases, and solution requirements.

☐ Provide specifications according to which the solution is defined, managed, and delivered.
